SUMMARY

Frontend Developer with **2+ years** of experience building production web and mobile applications with React.js, Next.js, TypeScript and React Native. Delivered **5+ production applications** at EWall Solutions, built reusable component architecture shared across projects, and cut deployment time by **40%** with Jenkins CI/CD pipelines.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Remix.js, HTML5, CSS3, Tailwind CSS

State & Data: Redux, Context API, REST API integration

Backend & CMS: Node.js, Express.js, REST APIs, Directus (headless CMS)

DevOps & Tools: Git, GitHub, Jenkins (CI/CD), PM2, Nginx, Linux

EXPERIENCE

Junior Software Developer | EWall Solutions Pvt. Ltd.

May 2024 – Present

- Developed and maintained **5+ production web and mobile applications** using React.js, Next.js, React Native and TypeScript.
- Built a reusable component architecture shared across projects, reducing duplicated code and speeding up delivery of new features.
- Owned features across the full lifecycle: requirement gathering with stakeholders, development, deployment and production support.
- Reduced deployment time by **40%** by implementing CI/CD pipelines with Jenkins; deployed and managed applications on Linux servers using PM2 and Nginx.

PROJECTS

Invoyro – Invoice & e-Invoicing Platform

Next.js, TypeScript, Express.js

- Built responsive invoice creation and management features with Next.js and TypeScript.
- Integrated **Government e-Invoicing APIs** so businesses can generate compliant e-invoices directly from the platform.
- Implemented dynamic PDF generation with **multiple customizable invoice templates**.

Quran & Prayer Times Mobile App

React Native, TypeScript

- Built a cross-platform app for **Android and iOS** from a single React Native + TypeScript codebase.
- Implemented Quran reading, prayer times and Qibla direction features.
- Integrated device geolocation to calculate accurate, location-based prayer schedules.

Restaurant Recipe Management System

Remix.js, Directus

- Built a Remix.js web application to manage and display daily meal plans, configured for **20+ organizations** with their own requirements.
- Integrated Directus as a headless CMS so meal plans and content could be updated without code changes.
- Designed the UI and **15+ visual banner assets** used across the application.

EDUCATION

Bachelor of Computer Applications (BCA), Thanthai Hans Roever College

2024 80%

CERTIFICATIONS
